

## ***Mercy Health Plans Complete Coding Initiative***

### **Diabetes and Diabetic Condition Coding for Medicare Based Hierarchical Condition Categories (HCC's)**

Diabetes Mellitus is the inability to metabolize carbohydrates, proteins and fats with insufficient secretion of insulin. Symptoms may be unremarkable, with long-term complications, involving kidneys, nerves, blood vessels and eyes.

Uncontrolled diabetes is a nonspecific term indicating that the current treatment regimen does not keep the blood sugar level of a patient within acceptable levels.

This supplemental form was created to be used in conjunction with your normal superbill to better identify patients with chronic diseases. Use this reference sheet to increase diagnosis specificity of chronic conditions that affect your clinical decision making and plan of care. Please remember that documentation in your clinical record must support the billed diagnosis codes.

Code	Manifestation	Description	Code	Manifestation	Description
250.00		DMII without complications not stated as uncontrolled		362.02	proliferative diabetic retinopathy
250.01		DMI without complications not stated as uncontrolled		365.44	diabetic glaucoma
250.02		DMII without complications, uncontrolled	<b>250.60</b>		<b>DMII with neurologic manifestation not stated uncontrolled</b>
250.03		DMI without complications, uncontrolled	<b>250.61</b>		<b>DMI with neurologic manifestation not stated uncontrolled</b>
250.10		DMII with Ketoacidosis not stated as uncontrolled	<b>250.62</b>		<b>DMII with neurologic manifestation, uncontrolled</b>
250.11		DMI with Ketoacidosis not stated as uncontrolled	<b>250.63</b>		<b>DMI with neurologic manifestation, uncontrolled</b>
250.12		DMII with Ketoacidosis, uncontrolled		357.2	diabetic polyneuropathy
250.13		DMI with Ketoacidosis, uncontrolled		536.3	diabetic gastroparesis
250.20		DMII with Hyperosmolarity not stated as uncontrolled		353.3	diabetic amyotrophy
250.21		DMI with Hyperosmolarity not stated as uncontrolled	<b>250.70</b>		<b>DMII with peripheral circulatory disorder not stated uncontrolled</b>
250.22		DMII with Hyperosmolarity, uncontrolled	<b>250.71</b>		<b>DMI with peripheral circulatory disorder not stated uncontrolled</b>
250.23		DMI with Hyperosmolarity, uncontrolled	<b>250.72</b>		<b>DMII with peripheral circulatory disorder, uncontrolled</b>
250.30		DMII with Other Coma not stated as uncontrolled	<b>250.73</b>		<b>DMI with peripheral circulatory disorder, uncontrolled</b>
250.31		DMI with Other Coma not stated as uncontrolled		784.4	diabetic gangrene
250.32		DMII with Other Coma, uncontrolled		443.81	diabetic peripheral angiopathy
250.33		DMI with Other Coma, uncontrolled	<b>250.80</b>		<b>DMII with other specified manifestation not stated uncontrolled</b>
<b>250.40</b>		<b>DMII with renal manifestation not stated uncontrolled</b>	<b>250.81</b>		<b>DMI with other specified manifestation not stated uncontrolled</b>
<b>250.41</b>		<b>DMI with renal manifestation not stated uncontrolled</b>	<b>250.82</b>		<b>DMII with other specified manifestation, uncontrolled</b>
<b>250.42</b>		<b>DMII with renal manifestation, uncontrolled</b>	<b>250.83</b>		<b>DMI with other specified manifestation, uncontrolled</b>
<b>250.43</b>		<b>DMI with renal manifestation, uncontrolled</b>		731.8	diabetic bone changes
	585.9	chronic kidney disease, unspecified		707.10	diabetic ulcer of lower limb
	583.81	diabetic nephropathy	250.90		DMII with unspecified complication not stated as uncontrolled
	581.81	diabetic nephrosis	250.91		DMI with unspecified complication not stated as uncontrolled
<b>250.50</b>		<b>DMII with ophthalmic manifestation not stated as uncontrolled</b>	250.92		DMII with unspecified complication, uncontrolled
<b>250.51</b>		<b>DMI with ophthalmic manifestation not stated as uncontrolled</b>	250.93		DMI with unspecified complication, uncontrolled
<b>250.52</b>		<b>DMII with ophthalmic manifestation, uncontrolled</b>			
<b>250.53</b>		<b>DMI with ophthalmic manifestation, uncontrolled</b>	379.23		Vitreous Hemorrhage
	362.01	background diabetic retinopathy	V58.67		Long-Term Use Of Insulin

**Bolded** codes are combination codes and must be used in conjunction with an additional manifestation code.

**Manifestation** must be documented as diabetic.
